

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH (AIUB)

Faculty of Science and Technology (FST)
Department of Computer Science (CS)
Undergraduate Program

COURSE PLAN	SEMESTER: Summer 2025-2026
I. Course Core and Title CSC 3217 Artificial Intelligence and Expert System II. Credit 3 credit hours (2 hours 20mins of Lab & 2 hour theory per week) III. Nature Core Course for CS, CSE, CSSE, SE, CIS IV. Prerequisite CSC 2211 Algorithms	V. Vision: Our vision is to be the preeminent Department of Computer Science through creating recognized professionals who will provide innovative solutions by leveraging contemporary research methods and development techniques of computing that is in line with the national and global context. VI. Mission: The mission of the Department of Computer Science of AIUB is to educate students in a student-centric dynamic learning environment; to provide advanced facilities for conducting innovative research and development to meet the challenges of the modern era of computing, and to motivate them towards a life-long learning process.

VII - Course Description

- Analyze four different types of intelligent agents and their environment.
- Explain and compare different searching techniques using BFS, DFS, UCS, DLS, and IDS.
- Illustrate informed search and exploration methods like A* and Hill Climbing.
- Explain Constraint satisfaction problems and search techniques in game playing.
- Discuss Probability, Bayes Theorem and Bayes Networks for problem solving.
- Explain Genetic Algorithm for problem solving.
- Illustrate Neural Network notations and architectures and solve problems using perception learning rules.
- Explain Expert System for problem solving.

VIII – Course outcomes (CO) Matrix

By the end of this course, students should be able to:

COs*	CO Description	Level of Domain***			PO Assessed****
		C	P	A	
CO1	Express various concepts from Artificial Intelligence and Expert System research domain using various complex problems considering experimental design, data analysis and interpretation and information synthesis to provide valid conclusions.			3	PO-f-1
CO2	Explain basic ideas of artificial intelligence so that students will be able to know about the metrics related to performance which will help them to differentiate between different types of Expert systems.			3	PO-f-1

CO3 **	Demonstrate different Artificial Intelligence techniques such as search algorithms, genetic algorithms, CSP and uncertainty etc. to solve different real-life problems.			3	PO-f-1
CO4	Justify different AI techniques to provide valid conclusions in real-life problem-solving.	5			PO-f-2

C: Cognitive; P: Psychomotor; A: Affective Domain

* CO assessment method and rubric of COs assessment is provided in later section

** COs will be mapped with the Program Outcomes (POs) for PO attainment

*** The numbers under the 'Level of Domain' columns represent the level of Bloom's Taxonomy each CO corresponds to.

**** The numbers under 'PO Assessed' column represent the POs each CO corresponds to.

IX – Topics to be covered in Theory class*

Time Frame	CO Mapped	Topics	Teaching Activities	Assessment Strategy(s)
Week 1	CO1, CO2	OBE Discussion. Chapter 1 Introduction: Definition of AI, Foundations of AI, History of AI, What AI can do Today.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 2	CO1, CO2	Chapter 2 Intelligent Agent: Agent and Environment, The Concept of Rationality, Nature of Environments, Structure of Agents.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 3	CO1, CO2, CO3	Chapter 3 Solving problem by searching: Problem-Solving Agents, Example Problems, Uninformed Search Strategies	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 4	CO1, CO2, CO3	Chapter 3 Solving problem by searching: Informed (Heuristic) Search Strategies, Heuristic Functions	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 5	CO1, CO2, CO3	Chapter 5 Adversarial search: Games, Optimal Decisions in Games, Alpha-Beta Pruning.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 6	CO1, CO2, CO3	Review DFS, BFS, UCS, Greedy Best First Search, A* Search Algorithm.	Question-answer	Assignment/Project, Quiz, Term Exam
Midterm (Week 7)				
Week 8	CO2, CO3, CO4	Chapter 4 Local Search Algorithms and Optimization Problems: Hill-climbing Search, Simulated Annealing, Local Beam Search. Genetic Algorithm: Biological Background, Basic Outline, Encoding system, Crossover, Mutation, Selection.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 9	CO2, CO3, CO4	Chapter 18 Learning from Examples: Forms of Learning, Supervised Learning, Regression and Classification with Linear Model	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 10	CO2, CO3, CO4	Chapter 18 Artificial Neural Networks: Neural network structures, Single-layer feed-forward neural	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam

		networks (perceptron), Multi-layer feed-forward neural networks, Learning in multi-layer networks.		
Week 11	CO2, CO3, CO4	Chapter 13 Quantifying Uncertainty: Basic Probability Notation, Inference Using Full Joint Distributions, Independence and Bayes' Rule and Its Use.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 12	CO3, CO4	Chapter 14 Probabilistic Reasoning: Bayesian Network and semantic, Exact Inference in Bayesian Networks, Approximate Inference in Bayesian Networks.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Week 13	CO2, CO3, CO4	Chapter 6 Constraint Satisfaction Problems(CSP): Define CSPs, Backtracking search for CSPs. Improving backtracking efficiency: Most constrained variable- minimum remaining values (MRV), Forward checking.	Lecture, Question-answer, Lab Practice	Assignment/Project, Quiz, Term Exam
Final term (Week 14)				
Makeup Evaluation (Week 15)				

* The faculty reserves the right to change, amend, add or delete any of the contents.

X – Mapping of PO/PLO and K, P, A of this course:

PO Indicator ID	PO Indicators Definition (As per the requirement of WKs)	Domain	K	P	A
PO-f-1	Apply information and concepts in natural science with the familiarity of issues.	Affective Level 3 (Valuing)			
PO-f-2	Formulate solutions, procedures, and methods using first principles of mathematics for engineering sciences.	Cognitive Level 5 (Evaluating)	K7	P1 P3 P7	

XI – K, P, A Definitions

Indicator	Title	Description
K7	Comprehension of engineering in society	Comprehension of the role of engineering in society and identified issues in engineering practice in the discipline: ethics and the engineer's professional responsibility to public safety; the impacts of engineering activity; economic, social, cultural, environmental and sustainability.
P1	Depth of knowledge required	Cannot be resolved without in-depth engineering knowledge at the level of one or more of K3, K4, K5, K6 or K8 which allows a fundamentals-based, first principles analytical approach.
P3	Depth of analysis required	Have no obvious solution and require abstract thinking, originality in analysis to formulate suitable models.
P7	Interdependence	Are high level problems including many component parts or sub-problems.

XII – Mapping of CO Assessment Method and Rubric

The mapping between Course Outcome(s) (COs) and the Selected Assessment method(s) and the mapping between

Assessment method(s) and Evaluation Rubric(s) is shown below:

COs	Description	Mapped POs	Assessment Method	Assessment Rubric
CO1	Express various concepts from Artificial Intelligence and Expert System research domain using various complex problems considering experimental design, data analysis and interpretation and information synthesis to provide valid conclusions.	PO-f-1	Quiz / Term Exam	Rubric for Quiz / Term Exam
CO2	Explain basic ideas of artificial intelligence so that students will be able to know about the metrics related to perform which will help them to differentiate between different types of Expert systems.	PO-f-1	Quiz / Term Exam	Rubric for Quiz / Term Exam
CO3	Demonstrate different Artificial Intelligence techniques such as search algorithms, genetic algorithm, CSP and uncertainty etc. to solve different real-life problems.	PO-f-1	Assignment / Project / Term Exam	Rubric for Assignment / Project / Term Exam
CO4	Justify different AI techniques to provide valid conclusions in real life problem solving.	PO-f-2	Assignment / Project / Term Exam	Rubric for Assignment / Project / Term Exam

XIII – Evaluation and Assessment Criteria

CO1: Express various concepts from Artificial Intelligence and Expert System research domain using various complex problems considering experimental design, data analysis and interpretation and information synthesis to provide valid conclusions.

Assessment Attribute/Criteria	Missing/ Incorrect (0)	Inadequate (1-3)	Satisfactory (4-7)	Excellent (8-10)
Problem Understanding	Not answered or the presented description is incorrect.	The problem is understood, but the terminologies are not used correctly.	The problem is explained with correct information containing little mistakes.	The problem is understood and presented correctly with all required information.
Demonstration with examples	The relevant example is not shown or explained.	The given example does not fit for the problem but has some relevances.	The given example is relevant but lacks adequate explanation.	The given example is relevant and demonstrated with a proper interpretation.

CO2: Explain basic ideas of artificial intelligence so that students will be able to know about the metrics related to perform which will help them to differentiate between different types of Expert systems.

Assessment Criteria	Missing/ Incorrect (0)	Inadequate (1-3)	Satisfactory (4-7)	Excellent (8-10)
Explanation	No/wrong explanation is given.	The explanation is not sufficient to illustrate the understanding of the given problem.	A correct explanation is provided but has little issues.	The given explanation is correct and appropriately presented to understand the problem.
Demonstration with examples	The relevant example is not	The given example does not fit for the	The given example is relevant but lacks	The given example is relevant and

	shown or explained.	problem but has some relevances.	adequate explanation.	demonstrated with a proper interpretation.
--	---------------------	----------------------------------	-----------------------	--

CO3: Demonstrate different Artificial Intelligence techniques such as search algorithms, genetic algorithm, CSP and uncertainty etc. to solve different real-life problems.

Assessment Attribute/Criteria	Missing/ Incorrect (0)	Inadequate (1-3)	Satisfactory (4-7)	Excellent (8-10)
Applicability	An incorrect method or no method is selected to solve the problem.	The problem is solved using the required method with major mistakes.	There are minor mistakes in the presented solution that is using a proper method.	An appropriate method is applied with all given requirements.
Demonstration	The demonstration is not provided or irrelevant for the given problem.	There is a little relevancy between the problem and the provided demonstration.	The relevant demonstration is given with little missing information or steps.	The demonstration is given with all the relevant information.

CO4: Justify different AI techniques to provide valid conclusions in real life problem solving.

Assessment Attribute/Criteria	Missing/ Incorrect (0)	Inadequate (1-3)	Satisfactory (4-7)	Excellent (8-10)
Methodology	No appropriate method is used.	A proper method is used to solve the problem, but not presented in a correct way.	The used method is correct, but it is not complete and not fully understandable.	The used method is appropriate, complete and satisfy all requirements.
Justification	A wrong or no justification is presented.	The justification is given without a proper description.	An appropriate justification is provided with minor issues.	The justification is given with an appropriate description.

XIV- Course Requirements

- Students are expected to attend at least 80% class.
- Students are expected to participate actively in the class.
- For both terms, there will be at least 2 quizzes based on the theoretical knowledge and conceptual understanding of the topic covered discussed in the classes.
- Submit report based on the given course related problems.
- Submission of assignment and projects should be in due time.

XV – Evaluation & Grading System*

The following grading system will be strictly followed in this class:

Mid Term Exam:

Term Exam: 50%

Quizzes: 20%

Attendance & Performance: 10%

Lab Evaluation: 20%

Final Term Exam:

Term Exam: 50%

Quizzes: 20%

Attendance & Performance: 10%

Lab Evaluation: 20%

Semester grade: 40% midterm + 60% final term

Letter	Grade Point	Numerical %
A+	4.00	90-100
A	3.75	85 - < 90
B+	3.50	80 - < 85
B	3.25	75 - < 80
C+	3.00	70 - < 75
C	2.75	65 - < 70
D+	2.50	60 - < 65
D	2.25	50 - < 60
F	0.00	< 50
I		Incomplete
W		Withdrawal
UW		Unofficially Withdrawal

* The evaluation system will be strictly followed as per the AIUB grading policy.

* CO attainment will be achieved with 60% of the evaluation marks.
